Features

Deliver Clear Messaging that Resonates

Whether for a retailer promoting new sales or a transportation hub keeping travelers on schedule, clear information delivery drives success. Samsung’s QMN Series help businesses achieve these goals through compelling UHD picture quality, extensive connectivity and ongoing 24/7 performance.

Share Intelligent, High-Quality Content

Intelligent Picture Quality

The QMN Series displays leverage Samsung’s Intelligent Picture Quality technology to elevate content delivery in any setting. This refined presentation transforms content from any source to UHD-level quality, and optimizes on-screen text and imagery with crisp edges and fine detail.

Streamline Operational Efficiency

The embedded MagicINFO Player S6, backed by the powerful TIZEN operating system, boosts the displays overall performance, allows for painless content management and ensures seamless content transition and playback.

Empower Secure and Remote Collaboration

Samsung’s KNOX platform provides rigid three-layer protection while also securing and controlling USB and user network exchange through dedicated signage device management. With added security, businesses can facilitate remote, PC-free meetings without risk or complexity.

Maintain Continuous Display Performance

Beyond security and content management, QMN Series users can trust the displays’ remote management for fast, efficient

issue mitigation. Users can monitor and diagnose irregularities – both on their own and with help from Samsung’s 24/7 Network Operations Center – from any location.

Enjoy Convenient Display Management

The QMN Series’ integrated centralized infrared receiver (IR) ensures easier and more flexible user control. Each display receives signals on individual panels via Central IR, and users can navigate the IR functionality from various locations to further augment uninterrupted performance.

Shield Content From Outside Interference

The QMN Series’ durable, IP5x-validated design ensures continuous, glare-free content delivery regardless of environmental conditions. As a result, transportation hubs and other arenas susceptible to dust, dirt and lighting exposure can activate and run the displays without an external enclosure.

* IP5x validation ensures satisfactory operation even with a certain level of dust inside the product. However, product operation is not guaranteed when exposed to particular types of dust, such as metal dust.

Accelerate Multi-Screen Content Delivery

For added flexibility, the QMN Series offers users HDMI 2.0 and DP 1.2 port connectivity. This versatility ensures a consistent 60 Hz. refresh rate and optimal clarity regardless of the source. Additionally, users can configure UHD daisy chains up to 2x2 in size through the HDMI 2.0 port.
